

Inside the Sun

© 2004 John J. Freeman (BMI)

See what's in my dream, what's in my mind
I step outside of time
And see that all infinity is always here with me
I never had to ask her why she breathed and gave me life
It's just a gift that I believe I received

And the whole world's coming back again
To the place where we came from
Fools and prophets, leaves and rockets
All will live as one, inside the sun

Feel it all around, look inside
And open up your eyes
It's okay to wonder why you live, you breath, you die
It's all a temporary dream made from what you believe
It's just so beautiful to me, to be

And the whole world's coming back again
To the place where we came from
Fools and prophets, leaves and rockets
All will live as one, inside the sun

Inside the sun, inside the sun
Inside the sun, inside the sun

And the whole world's coming back again
To the place where we came from
Fools and prophets, leaves and rockets
All will live as one, inside the sun

Inside the sun, inside the sun
Inside the sun, inside the sun
Inside the sun, we will live as one
Inside the sun, we will live as one
