

Vibrate

© 2015 John J. Freeman (BMI)

Come vibrate with me on this plane of existence  
Imagine the things that you'll see  
When you're free to have dreams, and you're free to have questions  
And free to just sit there and be  
Quietly be free

Come vibrate with me on this plane of existence  
Imagine the things that you'll see  
When you're free to have dreams, and you're free to have questions  
And free to just sit there and be  
Quietly be free

Holding onto the shadows, holding onto a piece of the wind  
Reaching out for an answer, when the answer comes from within  
Let's ride the light to the front of the night and see where it begins as it ends  
They've torn it all down, but we've built it before, and lord knows we can build it again

Come vibrate with me on this plane of existence  
Imagine the things that you'll see  
When you're free to have dreams, and you're free to have questions  
And free to just sit there and be  
Quietly be free

Holding on to a concept, holding tight to illusions of sin  
Reaching out for forgiveness, when forgiveness comes from within  
All this time we've been standing in line, now it's time to break free from the chains  
And realize now all the thoughts and the sounds and the music we came here to play

Come vibrate with me on this plane of existence  
Imagine the things that you'll see  
When you're free to have dreams, and you're free to have questions  
And free to just sit there and be  
Quietly be free

Come vibrate with us on this plane of existence  
Imagine the things that you'll see  
When you're free to have dreams, and you're free to have questions  
And free to just sit there and be  
Quietly be free
